AGIC MELON AUTOFLOWER

FLOWERING TIME 55 days, October 1 - 15 Effect: Indica (55% Indica 45% Sativa) Very Pungent | Dense Trichomes

Have the best of both worlds with our Feminized Magic Melon Autoflower! Combining the acclaimed Magic Melon with the ease and vigor of an auto makes this an obvious choice for anyone who wants a lot of bud quickly. All autos need favorable conditions throughout the life cycle, particularly the early veg stage. May also 🚬 flower early if roots feel constrained. We've been improving autoflowers to be as gorgeous as any full season strain, so experience the ease and production of autoflowers from your trusted source!

ROYAL HIGHNESS ORIGINAL STRAIN

FLOWERING TIME 55 days, Sep. 25 - Oct. 10 55% Indica 45% Sativa | Extremely dense and productive Potency of Kush, non-drowsy | F6

A recently refined version of one of our original creations, Royal Highness is a cross of epic potency and production that is sure to knock your crown off. This plant produces buds the size of baseball bats, absolutely dripping with resin. The distinct Kush smell of Royal Highness is due to her high levels of α-Humulene and β -Pinene, which reportedly produce anti-microbial effects. One of our most trichome covered varieties

FLOWERING TIME 55 days, Sep. 25 - Oct. 10

75% Indica 25% Sativa | F5 | Massive production Dependable | Distinct citrus smell, calming & powerful Also known as "Staffs of JAH" this extremely tall variety grows like a cluster of Bamboo, each branch reaching to heavens. Each cain holds a massive amount of uniformly large buds that absolutely reek of lemons. Get ready to bust out the orchard ladder for this one come harvest time. Lemon Kushs' smell comes from her high production of Limonene—a reported anti microbial.

SIGNATURE STRAIN

FLOWERING TIME 50 days, Sep. 20 - Oct. 5 Indica Dominant, nicely balanced with Sativa | Bx8 Funhoric mood lifting effects, anti-anxiety Thick sweet smell & Rich purple color | THC 18-25% CBD 0.1% Reliable production & tenacious growth

P.P.D. (formerly known as Purple Panty Dropper) is Humboldt Seed Company's original strain. These seeds produce big plants with uniform growth and great yields. These purple buds are moderately dense, with a sweet, floral, almost concord grapelike scent and aphrodisiac smoke. Of course panties must be dropped consensually

Orange

FLOWERING TIME 45 days, September 15-25 Sweet smoke with notes of blueberries & pineapple | THC 17-21% CBD .14%

Balanced Indica & Sativa | F4 | Vigorous, mold resistant plant This signature cross between some of HSC's favorite strains, Pineapple Train Wreck and Blueberry Muffin, offers the best of both plants. Pineapple Muffin produces vigorous, mold-resistant, plants that grow wide and tall. The dense buds are bright green with purple flaking. The sweet blueberry scent is highlighted by pineapple, creating a delicious smoke that tastes just like pineapple upside down cake. The sweet flavor may leave you relaxed and productive

Pine

'RHFFILA TREE

FLOWERING TIME 60 days, October 1-1: Indica Dominant | Huge purple Colas | THC 18-23% CBD .15% 🚃

Smoke may make one conscious and aware | F4 Truffula Tree is a new strain created by one of our most experi enced breeders. Bred to produce larger colas than G.S. Cookies while still retaining the bright purple and sweet smell. Purple plants covered with frost in the morning dew awaken the soul and brighten up the day. This smoke may leave you wide eyed and consciously aware of the natural beauty all around you. Great for a day hike or a lazy summer afternoon after a river clean up.

ORIGINAL STRAIN

FLOWERING TIME 55 days, Sep. 25 - Oct. 10 60% Indica 40% Sativa | Bx4 | A Purple Train Wreck hybrid with vigorous, wide growth | Mold resistant with unique traits & pleasant calming effects Rich Train Wreck & Strawberry Cough undertones

A purple train wreck phenotype unlocked when we crossed rain Wreck with the original Blueberry Muffin. We knew it was a "unicorn" from the beginning. An excessively wide growth pattern will fill your garden past the point of reason, but not to worry—she is extremely resistant to Powdery mildew and bud rot. Its signature turpentine smell comes in part from high levels of Terninolene

Avg. THC 22% | Effect: Sativa (20% Indica 80% Sativa) Sweet Mind Expanding Berry Flavor | Vigorous Tall Growth Via 2017's collaborative phenotype hunting by Rising Leaf Farms in Oregon we were alerted to a plant from an R&D seed batch we had made from a Shishkaberry mother and Trufula Tree father. On a visit with Jennifer and Jason of Rising Leaf, we experienced first-hand the magical genetics of this gorgeous plant with its special terpene profiles and effects. Now we are able to release Raspberry Parfait, another balanced breakfast strain from Humboldt Seed that's destined for fame!

FLOWERING TIME 45 days, Sep. 15 - Oct. 1 Indica Dominant | Sweet strong blueberry scent Energizing | F9 double breeding line for hybrid vigor Blueberry Muffin is a company favorite. This seed produces plants that grow uniformly and produce frosty colas highlighted with purple flakes. The buds smell powerfully like fresh baked blueberry muffins, making the naming of this strain a piece of muffin

SOL MATE AUTOFLOWER ORIGINAL STRAIN

FLOWERING TIME 55 days, October 1-15 Avg. THC 17-22% | Effect: Indica (55% Indica 45% Sativa) Sweet, Gassy, Pungent | Wonderful Relaxing High

A Feminized Autoflower that will put out the weight and the trichome production rivals indoor flower even when grown outdoors! The taste is like nothing we've seen in photoperiod type cannabis, reminding us of ripe cherimoya and even durian with a fuel after burn. Sol Mate Auto will get you through the tough times whether you're a hobbyist wanting to grow in an

FLOWERING TIME 70 days, October 10-25 Avg. THC 24% | Effect: Sativa (40% Indica 60% Sativa)

Bursting with Terpenes | Explosive, Sturdy Growth Created by the team at HendRx Farm, the Wedding Tree is a match made in heaven! Humboldt Seed Co. has a long history of crafting the cannabis genome with HendRx. We may have written the recipes and mixed the batter for cultivars like Blueberry Muffin, but HendRx nursery has been out overly now me are release some of the heat that they have always brought to the but HendRx nursery has been our oven. Now we are excited to curated by HSC, and an engagement you won't want to miss!

NOTORIOUS T.H.C. ORIGINAL STRAIN

FLOWERING TIME 65 days, October 5-20 Avg. THC 25-30% | Effect: Indica (65% Indica 35% Sativa) Lung Expanding Pure Kush Flavor | Mind Bending Philosophical His With the current market putting so much emphasis on T.H.C., we had to give the people what they want. But "be careful what you ask for because you just might get it". We wanted to produce seeds to share, and now it's all we do, day and night. So, be careful. . . you wanted to get really stoned; now you can! But we didn't sacrifice the terpenes, she drips gas and her trichomes

shine like diamonds in the moonlit Humboldt skies. Get ready for

huge production, dense gigantic colas, and wonderful terpenes

FLOWERING TIME 60 days, October 1-15 Sativa Dominant | Crystal covered bud | Mold-resistant F5 | THC 17-25% CBD .09%

Incredibly similar to a strain which will remain unnamed for legal reasons. Produces big, fluffy nugs that are absolutely covered in sticky crystals. Trimmers have found their scissors glued together after working on these nugs, perfect for taking a break to enjoy this excellent smoke. The piney, floral, sour smoke is a total knock-out that will leave you glued to the couch in a state of uplifting relaxation. Ultimate appeal with 25% + THC notentials

FLOWERING TIME 60 days, October 1-15 Balanced Indica and Sativa | Relaxing and uplifting Large, dense nugs covered in red hairs | F4 THC 23-28% CBD .04%

Imagine a sleepy fireplace on a cold, rainy day, inviting you to sit and unwind in the slow warmth it offers — this is the kind of fire channeled by our Emerald Fire OG. This plant offers large, dense nugs, covered in orange fiery hairs making it true to the name. This smooth, lemony, and piney smoke will make you sit back and soak in the environment around you.

BLOOD ORANGE AMETHYST Cinnamo ORIGINAL STRAIN ORANGE Skunk

FLOWERING TIME 55 days, Sep. 25 - Oct. 10 70% Indica 30% Sativa | F3 | A hardy plant, resistant to mold and mildew Pungent & unique smell, deep purple at harvest Rich, sweet & smooth taste with uplifting effects

So purple you can't believe your eyes. This stabilized cross of Blueberry Muffin and Purple Panty Dropper produces absolutely monstrous heavily branching plants, with uniform buds. A true connoisseur strain possessing a pungent unique smell of grapefruit with the taste to match. This plant takes purple to a whole new level. Amethyst's unique Blood Orange flavor comes in part from its high production of δ -Limonene, a reported uplifting terpene.

FLOWERING TIME 50 days, Sep. 20 - Oct. Indica Sativa Hybrid | Sour mango nectar scent | F5 | THC 24-28% CBD .02%

Refreshing, energizing, ethereal effects | Huge Production We have been breeding and crossing Mango Kush with Humboldt OG & Jack Herer for five years to prepare our Mango Trees seeds for the public. Imagine you are in Jamaica touring a gania plantation. As you walk back to the ranch house there's a lovely Rastafarian woman with fresh mango juice for you. You sit under the mango tree and the flavor overtakes you, providing instant refreshment and energy. That's the sensory experience

MANGU SHBRBBR'

FLOWERING TIME 50 days, Sep. 20 - Oct.5

F3 | Indica Dominant Hybrid | Deeply relaxing yet elevating effects Mango Creamy Strawberry Scent | THC 24-28% CBD .02% Mango & Sherbert must have been destined to meet at the HSC reeding facility in Eastern Humboldt. Our breeding coordinator is one of the best at pairing strains and we knew that the Mango Trees could work her magic while honoring the Sherbert's smooth flavor and mellow sweetness. Expect much larger plants than the Sherbert cut covered in the fuzzy trichomes you are used to from the strain. Light green buds with orange hairs smelling like mango sherbert with a hint of whip cream and a strawberry on top. Effects are relaxing, making it a great afternoon strain

FLOWERING TIME 65 days, Oct. 1 - Oct. 20

Backcrossed Selected Landrace | F4 Rare Terpenes Dill & Pepper

From our product tester Willy G comes a strain with a very high CBD to THC ratio. These seeds should all produce flower with an over 20:1 ratio of CBD. Willy G and his cousin procured these seeds from the Bakka Valley in Lebanon and we bred and pheno hunted them to find this wonderful silk-road masterpiece. These seeds are incredibly unique and Willy G is a wonderful person who uses cannabis to help with the effects of his cerebral palsy. Please credit Willy with any crosses you make of other uses of this strain—he deserves it!
